

**NEW!**

# PEARSON PRIME CHUTES

## Making the Best Better

The Pearson Prime chute combines the strength and durability that Pearson's has always offered with the quietness and flexibility needed for today's cattle handling needs. Quieter, with more convenient access, and with time-saving features, the Prime chutes are available with any Pearson headgate or tailgate.

You'll notice:

QUIET OPERATION

RUMP RATCHET BAR

BOTTOM ACCESS DOORS

CUSTOMIZABLE WITH ANY HEADGATE  
AND TAILGATE OPTION

Pearson Prime chute features 50/50 top wing gates and 60/40 bottom access doors. The Prime chute weighs 1745 lbs and is 8' 10" long

Prime chute with gravity headgate, rear headgate controls, manual head control unit, and wheel kit.

## FEATURES

Access the bottom half of the animal with convenient 60/40 bottom access doors

Rump ratchet bars with a high strength fiberglass bar coated to prevent splinters

50/50 wing gates for convenient access to the top half of the animal

Newly redesigned neck doors for wider and quieter access to the BQA triangle

All doors are easy to operate with one hand and have slam latches

Available with our self-catch or manual headgates.

Aluminum tailgate with automatic lock-down, lock-up is standard. A horizontal rolling gate or bi-fold tailgate is also available.

Additional options include scales, wheel kit, manual head control, and bolt-on palpation cage.

Upgrade to the Prime XL which includes a tall and wide palpation door for uninhibited access. The palpation section squeezes along with the rest of the chute, keeping calves from turning around.

The Prime XL weighs 2230lbs and is 11' 8.5" long
